# HISTORY

---

## *The College*

The Mt. San Antonio College (Mt. SAC) campus was originally part of the 48,000-acre La Puente Rancho. During World War II, the facility was converted into an Army hospital and later a Navy hospital. The Mt. San Antonio Community College (Mt. SAC) District was created in December, 1945 when voters of four local high school districts approved the formation of a community college district. Initially named Eastern Los Angeles County Community College, the institution was later renamed after Mt. San Antonio, the imposing, snow-capped mountain (popularly known as Mt. Baldy) prominently visible in the distance north of the campus. Mt. SAC opened in the fall of 1946 with 635 students. From its humble beginnings, the College now serves over 70,000 men and women from a wide array of backgrounds and generations.

The College boundaries encompass an area of approximately 189 square miles in the southeast corner of Los Angeles County, bordering Orange County on the south and San Bernardino County on the east. The 421 acre campus, located about thirty miles east of Los Angeles, is situated in Walnut, the geographic center of ten school districts and seventeen communities including Baldwin Park, Bassett, Charter Oak, Covina, Diamond Bar, the southern portion of Glendora, Hacienda Heights, City of Industry, Irwindale, La Puente, La Verne, Pomona, Rowland Heights, San Dimas, Valinda, Walnut, and West Covina. Quite naturally, the growth of Mt. SAC has mirrored that of the local area.

## *Continuing Education Division*

The Community Services department was established in 1971 to provide cultural, educational and recreational programs. Some of these community programs included the support of the planetarium, wildlife sanctuary, and art gallery as well as classes for senior citizens and gifted children. The Department was also responsible for Mt. SAC's public information and a speaker's bureau.

In 1978 Community Services was reclassified from a department to a division and the Division's first dean was appointed. The newly re-titled Community Education Division expanded to incorporate community enrichment, fee-based classes and new areas of adult education including Basic Skills, English as a Second Language, Older Adult, Parent Education, Disabled Education, and Health and Fitness.

By the late 1980s the Division began increasing its focus on entrepreneurship and economic development. In 1993 the Community Education Center (CEC) was established on the main campus and over the next few years grew to include programs such as GED preparation, Adult Basic Education, Adult High School Diploma, and High School Referral. Then in 2002 all noncredit programs were placed under the larger umbrella of the Instruction Team where they remain today.

Mt. SAC Continuing Education is the 5th largest noncredit program in the state of California. The Division has experienced dramatic change and tremendous growth in its 41 year history. There have been six name changes during this time and its most recent name change, Continuing Education, reflects the common terminology used by California community colleges for similar programs.

The main campus is now home to the Continuing Education Division office, the Language Learning Center, as well as Adult Basic Education, Adult High School Diploma, English as a Second Language, High School Referral, Noncredit Health Careers, Noncredit Short-Term Vocational programs, and the WIN Athletic Support Center. Community Education, Contract Education, and Older Adult Program courses are offered on campus and in public and private facilities throughout the Mt. SAC community. In 2010 changes in regulations and funding led to the elimination of Noncredit Fitness and Parent Education programs as well as the Developmentally Disabled Program, with the exception of a few classes maintained within the Older Adult Program.

---

# GOVERNANCE

---

Continuing Education has a clearly defined governance structure which originates from the Board of Trustees, the ultimate policy-making body of the College. The Board of Trustees is empowered by California law to be the policy-making body of Mt. San Antonio College (Mt. SAC). The Board consists of five community members and one Student Trustee. Members of the Board are elected by the qualified voters of the District to serve a four-year term. The Student Trustee is a non-voting member elected annually during a regular election of the student body.

The President/CEO oversees implementation of Board Policies and Administrative Procedures and is responsible for the overall administrative governance of the College. He seeks counsel from the President's Cabinet, which is the highest-level administrative decision-making body at Mt. SAC. The Cabinet meets with the President/CEO weekly and is charged with ensuring the long-term stability and success of the institution, consistent with Mt. SAC's mission, vision, and core values. The Cabinet develops policy-level agenda items and issues that require approval by the Board of Trustees. At a broader level the President's Advisory Council (PAC) provides input to the President/CEO on administrative, fiscal, and strategic issues.

Under the authority of the Board of Trustees, Mt. SAC has a participatory governance structure which facilitates joint responsibility, authority, and decision-making through the collaboration of administrators, faculty, staff, and students. Participatory governance councils and committees plan for the future, develop policies, establish regulations, and make recommendations which guide the College, including Continuing Education. The Academic Senate and the College President/CEO reach mutual agreement for district and governance structures as related to faculty roles, processes for program review, processes for institutional planning and budget development, and other issues recognized as academic and professional in nature. The Board of Trustees relies primarily on the Academic Senate for curriculum, including establishing prerequisites and placing courses within disciplines, degree requirements, grading policies, educational program development, standards and policies for student preparation and success, and policies for faculty professional development. Noncredit representatives serve on the Academic Senate as well as various College councils, committees, and task force teams. Representatives include faculty as well as classified and management staff.

# STUDENT PROFILES

---

## *Adult Basic Education*

The Adult Basic Education (ABE) Lab provides a variety of programs and assessments. There are different student profiles based on the purpose for which students utilize the lab. For example, the average GED student is a 20 year old Hispanic who did not complete high school and is interested in obtaining a GED to pursue an educational, vocational, or personal goal. Students who utilize assessment testing are likely to have completed high school and are generally between 18-23 years of age. Conversely, the typical computer literacy course student is a female who has at least a high school diploma and is interested in improving skills to return to the workforce.

## *Adult High School Diploma*

The range of student ages in the Adult High School Diploma Program is from 18-64, although the program is comprised primarily of 18-22 year olds (76%). The average student is Hispanic male who left high school in his junior or senior year. Although each student is enrolled both in morning and evening classes (a total of 36 possible hours per week), most attend one session or the other on a drop-in basis. Students generally take one class at a time and can complete a class in a minimum of 62.5 hours.

## *ESL*

Students that enroll in the ESL Program are focused on strengthening their English communication skills and many self-identify their primary occupation as “student”. Nearly 75% of students are between the ages of 18–45, and a majority is female (58%). The dominant ethnicities are Hispanic and Asian students. Some students wish to transfer their professional degree from their native country in order to obtain their license to practice their profession in the U.S while others are seeking to pursue a postsecondary education or improve their employability.

## *High School Referral*

The High School Referral Program continues to be offered as a means to support noncredit basic skills development for concurrently enrolled high school students in the community. The average student is 17 years old, Hispanic (60%), and is attending to improve an existing low grade (D or F). While 21 high school districts are serviced by the High School Referral Program, 68% of all students are from one of five districts: Chaffey, Pomona, Rowland, Walnut, or West Covina Unified. The average student is in class for eight hours per week, attending either for two hours each evening (Monday-Thursday) or two times a week for four hours. Students must have approval from their high school counselor and a parent to begin a course and can only take one course at a time.

## ***Language Learning Center***

Users of the LLC include both credit and noncredit students. Credit students are typically enrolled in language courses requiring completion of lab hours as assigned by their instructor. The vast majority of noncredit students attending the LLC are enrolled in the ESL Program or are on a waiting list to take ESL classes. These students are self-motivated individuals dedicated to practicing their English skills. Other noncredit students include community members who are looking to gain language skills for various purposes.

## ***Older Adult Program***

Older Adult Program students are primarily retired and over the age of 65 (65%). These students enter class with different levels of real world experience as well as a multitude of educational levels, age variances, and life skills. Some students focus on skill building leading to a means of supplemental income, while others focus on healthy aging goals. Since Older Adult students prefer to take classes in their home communities, 98% of courses are offered off campus. A typical Older Adult student enrolls in multiple classes each term and continues to participate in the program throughout the academic year. In the 2010-11 school year 73% of older adult students enrolled in fall persisted into the spring term.

## ***Noncredit Short-Term Vocational Program***

Students participating in noncredit vocational programs are seeking to complete one or more courses leading to professional advancement or employment. The courses lead to certificates in an array of vocations such as business, agriculture, manufacturing, and graphics, to name a few. Many students take just one or two classes that will advance their work skills, and it is common for them to request evidence of completion of a single course to submit to their employer. The noncredit vocational program is largely represented by courses and certificates that may be completed through enrollment in dual-listed noncredit/credit courses. There are three main reasons that students may choose to enroll as a noncredit rather than a credit student. They may already have a college degree and simply need a specific skills upgrade. They may be uninterested in a degree or certificate, but they simply want specific skills. Or they may lack confidence to succeed as a credit student; often students who initially enroll on a noncredit basis convert to the credit classes once they experience success. The courses and certificates are created and offered through a collaborative process with the various credit departments of the college.

## ***Noncredit Health Careers***

Although health could be considered another example of a vocational program, it is approached as a separate program from other vocational programs because of the entry requirements (e.g., physical examination, background check) as well as externships in clinical sites. Health Careers students seek opportunities for work or upward mobility in healthcare fields. Some are concurrently enrolled in credit, while others are healthcare workers or professionals seeking clinical skills upgrade. Many students participating in this program are preparing for health-related licensure or certification exams. Students in the In Home Support Services are seeking short-term training leading to employment; the majority of these students are unemployed (80%), Hispanic (80%) women (90%) seeking an entry level healthcare position.

## ***WIN Program***

The WIN Program is comprised of student athletes who are enrolled in credit courses. The average student is between the ages of 18-20 and 21 sports are represented with the largest being football and track. All participating students must take a minimum of 12 credit units in order to be eligible to participate in a sport and most will take between 12 and 15 credit units per semester.

# MAJOR FUNDING SOURCES

---

## Average Annual Budget

Mt. San Antonio College Continuing Education receives funding from several sources. The most significant source is an annual apportionment from the California Community Colleges Chancellor’s Office based on Mt. SAC student attendance (FTES, or “full-time equivalent students”). The annual apportionment forms the basis of the College general fund. The College (a single-campus district) allocates an annual portion of the district budget to Continuing Education. In 2010-11 the Continuing Education district budget was slightly over \$7.5 million.

Continuing Education Budget Sources

Additionally, Continuing Education receives one-time and ongoing funding from State of California categorical allocations and from several grants. A categorically-funded State allocation for noncredit matriculation services sustained a significant and ongoing cut beginning in 2009-10; the reduced award was partially backfilled for one year by ARRA (American Relief and Recovery Act) funds. Noncredit matriculation funding is expected to remain stable at its reduced rate for the foreseeable future. The next most significant funding source is WIA Title II (231), a Federal grant that has been renewed annually since the late 1990s. Other smaller sources of funds include WIA Title I, Health Resources and Services Administration (HRSA), and short-term project grants. All together, categorical and grant funding provided more than \$2.3 million to Continuing Education in 2010-11. Fiscal performance is monitored by Continuing Education, Mt. San Antonio College, and the various categorical and grant sources. District budget adjustments are tied to annual planning and outcomes. Several grant funds are tied specifically to student learning outcomes and other measures of student progress.

Budget legislation of recent years has placed priority on classes leading to transfer, career preparation, or completion of basic skills. Continuing Education scheduling has reflected this and has resulted in elimination of some programs as well as a reduction in course schedules across all programs. However, in spite of fiscal pressure and limitations, the College has been steadfast in valuing Continuing Education programs and students.

## Adult High School Credits Earned

Credit Source	2008-2009			2009-2010			2010-11		
	Number of Students Granted Credits	Number of Credits Granted	% of Total Credits Granted	Number of Students Granted Credits	Number of Credits Granted	% of Total Credits Granted	Number of Students Granted Credits	Number of Credits Granted	% of Total Credits Granted
Adult Diploma Classes	143	997	39	194	1554	47	200	1639	65
Mt. SAC Credit Classes <sup>1,2</sup>	56	1187.5	46	63	1360	42	43	550.5	22
Work Experience	39	392.5	15	29	366	11	27	334.5	13
<b>Total Credit Earned</b>	<b>207</b>	<b>2577</b>	<b>-</b>	<b>251</b>	<b>3279</b>	<b>-</b>	<b>240</b>	<b>2524</b>	<b>-</b>

1- Weighted 1:3.3

2- Beginning in 2010-11 students' earned college credits are only counted in the semesters they were earned. Previously, students' college credits were recorded in the semester evaluated. As a result, there is an apparent drop in the total number of Mt. SAC credit classes completed; however, this is due in large part to the data recording change.

### Adult Diploma Credits Earned by Type

Source: 2008-2009 & 2009-2010 ABE Data compiled by Yvette Santillan; 2010-2011 ABE Database Queries "AD Total Credits" and "College Credits"
